

GET THE FACTS COVID-19 in Children

Nearly
13 MILLION CHILDREN
tested positive for COVID
since pandemic onset.

FACT Children **DO** get COVID-19.

FACT Children can get severe or long-term disease from COVID-19.

After having COVID, your child could have long-term problems with:

- trouble breathing/asthma
- increased fatigue
- difficulty moving and playing
- loss of smell and taste
- brain fog

FACT COVID-19 vaccines are safe and effective for children.

Vaccines can prevent **7 in 10** COVID-19 hospitalizations.

More than **10 million** children 5-11 years old have already received COVID-19 vaccines.

There have been **no serious safety concerns** reported in children 6 months to 11 years.

**THE
BOTTOM
LINE**

COVID-19 vaccines protect young children against severe infection, even with Omicron.
